Professional Summary

Motivated and innovative IT specialist with a strong educational foundation in BTEC Information Technology. Passionate about software development, artificial intelligence, and building practical applications that solve real-world problems. Adept at developing cross-platform mobile apps using Flutter and Dart, as well as programming robust logic in Python. Eager to leverage technical skills, AI expertise, and creative problem-solving to contribute to forward-thinking tech projects.

Skills

- **Programming Languages:** Dart, Python
- **Frameworks & Tools:** Flutter, RESTful APIs
- **Concepts:** Mobile App Development, Desktop Apps
- **AI Integration:** Utilizing AI for code optimization & smart features
- **UI/UX:** Customizable, user-friendly interface design
- **Problem Solving:** Logic implementation, debugging

Projects

Game Scope (Mobile Application)

Technologies: Flutter, Dart, REST APIs | Platform: Android

- Developed a "game deal hunter" application that tracks and aggregates free game offers from major platforms including Steam, Epic Games, and Ubisoft.
- Integrated third-party APIs to ensure real-time, automatic updates whenever a game becomes temporarily free.
- Built the application entirely from scratch, leveraging AI assistance to optimize architecture and streamline the development process.

Tournament Management System

Technologies: Python | Platform: Desktop

- Designed a Python-based organizational tool tailored for schools, universities, and institutions to manage competitive tournaments.
- Engineered a robust team and participant management system supporting up to 4 teams and 20 individual members, with strict validation to prevent duplicate entries.
- Implemented custom administrative controls allowing users to set dynamic point limits, track progress on a dedicated challenges page, and view outcomes on a final leaderboard.

Smart Subscription & Expense Monitor

Technologies: Mobile App Frameworks, AI Voice Integration

- Created a financial tracking application to manage recurring subscriptions (e.g., YouTube) and daily expenses, featuring automated reminders 48 hours prior to due dates.
- Integrated an AI-powered voice assistant capable of processing spoken expense entries (e.g., "I spent \$5 on food today"), generating mini-receipts, and deducting the amount from the defined budget.
- Incorporated strong privacy features including PIN security, alongside an aesthetically pleasing, highly customizable user interface optimized for eye comfort.

Education

High School Diploma – BTEC Information Technology

Amman, Jordan

- **GPA:** 83.5%
- Specialized in practical and foundational IT concepts, preparing for advanced software development and computer science disciplines.

Certifications

- **Google AI Expert Certification**
<https://edu.exceedlms.com/student/award/uc3ysRzCtoFogRbLeAKQZky6?id=443757244>
- **Certified Training Certificate** – Center of Excellence for Digital Skills & Vocational Training Corporation
- **BTEC Level 2 and Level 3 Certificate** in Information Technology
- **Professional Practice / Occupational License Certificate**
